WELCOME TO THE “AGRIPOLIS” CAMPUS

UNIVERSITÀ
DEGLI STUDI
DI PADOVA

WELCOME TO THE CAMPUS

The **School of Agricultural Science and Veterinary Medicine** was established in 2013 after the latest Italian University reform when the former Faculty of Agricultural Sciences and the Faculty of Veterinary Medicine merged. Presently, the School accounts for around 4,000 students (undergraduate and graduate).

The *Agripolis* campus is in Legnaro, a small town in the south of Padova.

It includes also the Veterinary Teaching Hospital, the "Lucio Toniolo" experimental farm, the Regional Agency for Agriculture ("Veneto Agricoltura"), the Regional Institute for Animal Health and Disease and many agricultural and student associations.

While most lectures take place on the main campus, some programmes may include classes in **Vicenza** and **Conegliano**.

BY PLANE

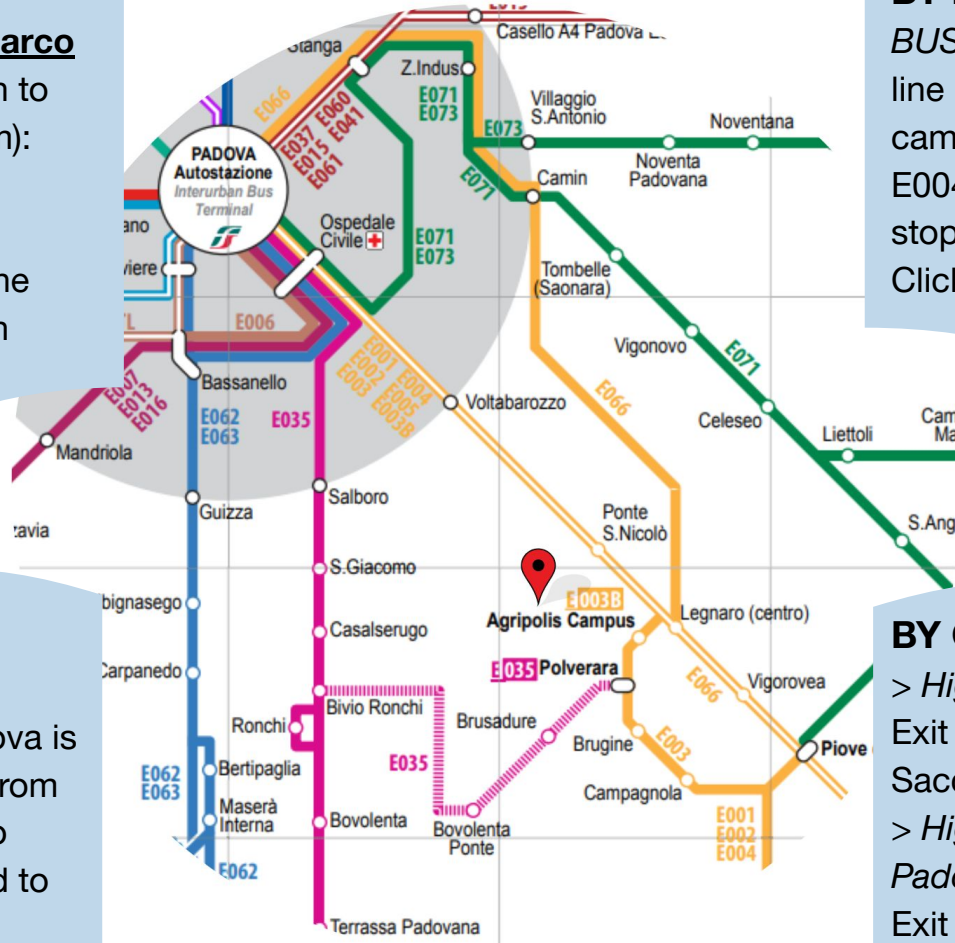

> From **Venice Airport "Marco Polo"**, take the bus or train to Padova train station (40 km): [click here](#)

> From **Treviso Airport "Antonio Canova"**, take the bus or train to Padova train station (70 Km): [click here](#)

BY TRAIN

The railway station in Padova is served regularly by trains from most major Italian cities; to reach Agripolis, you'll need to take a bus from there.

Click [here](#) to see the train schedules

BY BUS

BUSITALIA:
line E003 (stops in front of the campus) or E001/E604, E002, E004, E005_V/E005_Z (bus stop: Legnaro)
Click [here](#) for more info

BY CAR

> **Highway A4: Milano - Venezia**
Exit Padova Est, follow Piove di Sacco – Chioggia signs

> **Highway A13: Bologna - Padova**
Exit Padova Zona Industriale, follow Ponte S. Nicolò – Chioggia signs

LET'S START OUR TOUR!

The bus will
drop you in
front of the
main entrance:
let's meet there!

On your left, you will see two buildings: they are called “*Stecche*” (sticks) because of their shape.

Here you can find most Professors’ offices, as well as laboratories and lecture rooms (on the ground floor).

Click on the name of the Department to get to its website.

UNIVERSITÀ
DEGLI STUDI
DI PADOVA

The Veterinary Medicine building

In the "*Museum*" building you can find the laboratories of the Department Of Comparative Biomedicine And Food Science (BCA), but also the Educational Museum of Veterinary Medicine. It offers precious insights into the world of vertebrate species and their qualities, and it spreads all over the building: for example, you might find yourself refilling your water bottle next to the skeleton of a bovine...

UNIVERSITÀ
DEGLI STUDI
DI PADOVA

OVUD - The Veterinary Teaching Hospital

Behind you can see the VTH, also known as OVUD. It is managed by the Department of Animal Medicine, Production and Health (MAPS). It consists of 20 units that provide medical care for both traditional and non-traditional animals, livestock, and equines. The hospital offers 24/7 emergency veterinary services for animal owners. Here students of Veterinary Medicine carry out their mandatory traineeship.

Il Pentagono

Next stop: the *Pentagono*.
This building owes its name to its peculiar shape.

Here, you will find lecture rooms and laboratories, as well as admin offices and study spaces.
On the third floor is the library.

Worried you might get lost? 
Check the floor maps [here](#).

The “Pietro Arduino” library

Your UniPD ID card doubles as a library card: this means that you can read and borrow exam textbooks and access e-resources even when you are off-campus.

This applies to every library within the University Library System! You can check out opening hours and locations [here](#).

If you are looking for a place to stop and study, you will need to make a reservation via *Affluences*, a free app you can download from Google Play or the App Store.

With your student ID you can also [sign up for workshops](#) and connect to the eduroam WiFi service.

The Regional Agency for Agriculture “Veneto Agricoltura”

The semi-circular building belongs to the Regional Agency for Agriculture “Veneto Agricoltura”.

Veneto Agricoltura is the *Veneto Region’s Agency for Innovation in the Primary Sector*, and

- it supports the Regional Committee in the development of policies concerning farming, agro-food, forestry, and fisheries sectors
- it aims at encouraging innovation and promoting environmental sustainability
- it provides specialist services for the enhancement and commercialization of typical regional products
- it supports applied research, carrying out activities within European, national, and regional projects.

At the end of the path is *Ca' Gialla* (“The yellow House”).

Next to the entrance, on the right, you will often see people hanging out and getting something to drink from the cafeteria.

At Ca' Gialla you will find classes and laboratories. On the second floor are the admin offices for the BCA and MPAS departments; on the first floor there is the canteen. Don't forget: to access the canteens you need to use your

[Tesserino Mensa](#).

“Lucio Toniolo” Experimental farm

The “Lucio Toniolo” experimental farm

was set up in 1960 and currently occupies an area of 68 hectares.

Also located near the farm are the premises of the National Institute of Nuclear Physics (INFN) and the Regional Institute for Animal Health and Disease (Istituto zooprofilattico delle Venezie), a public veterinary institute.

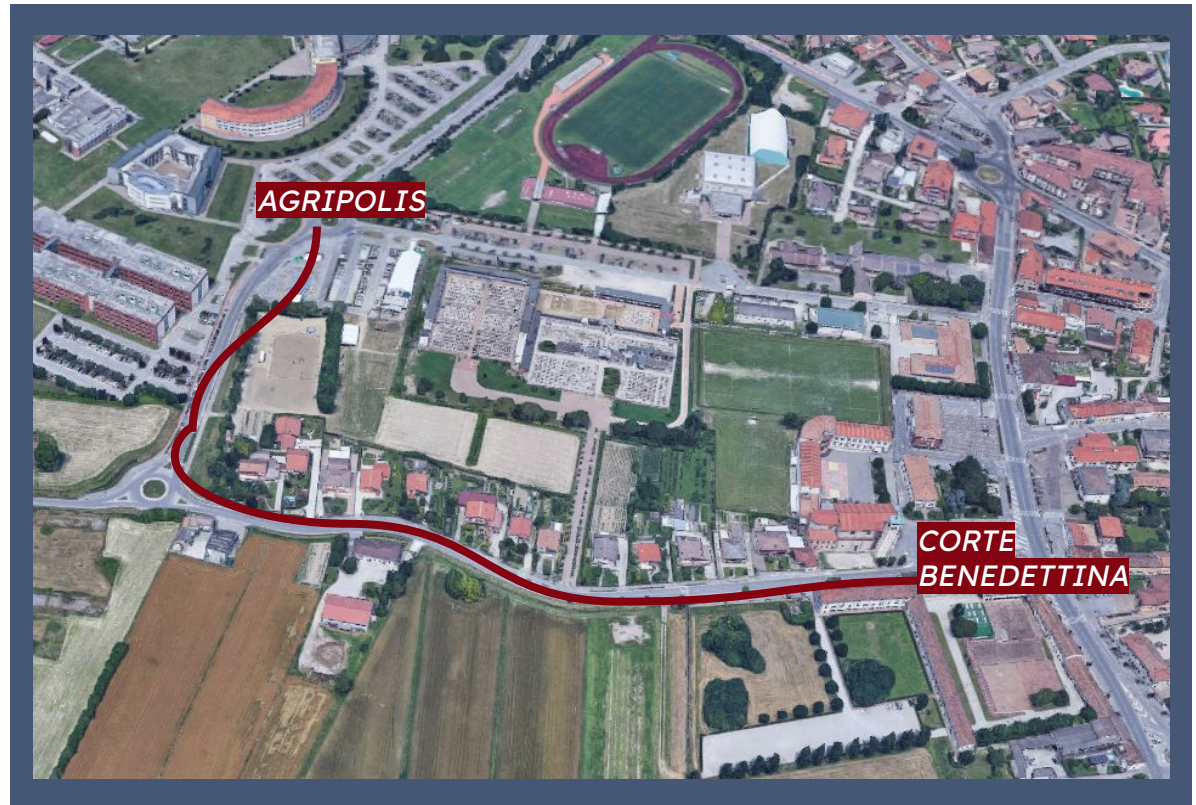

The farm is equipped with greenhouses, stalls, and an agrometeorological station used daily for logging data, plus machinery including tractors and seeders.

Its activities include teaching, experimental work, and crop cultivation, as well as the maintenance of green assets on the entire campus.

The *Corte Benedettina*, which dates back to the 15th century, used to be a monastery and has now been converted to university use: the number of degree programmes and students keeps growing!

It takes only a few minutes to go from the campus to the *Corte*: follow the directions to *Scuola di Agraria e Medicina Veterinaria / School of Agricultural Sciences and Veterinary Medicine*.

Besides the lecture rooms *Sala Agricoltura*, *Aula Montecchio*, *Aula Filanda I* and *Aula Filanda II*, in the Corte Benedettina you will also find:

→ The academic administration offices of the **School of Agricultural Sciences and Veterinary Medicine**

→ The **Tutor Desk** (enrolled students who support other students throughout their University career)

→ The **Mobility Desk**

→ The **Career Stage Office**

→ The **International Desk**

→ The **Students Association AUSF** (a non-political and non-profit organization founded by a group of forest science students, but open to students from any programme)

welcome
TO AGRIPOLIS

We look forward to seeing you there!
